3 Days of DevOps in 1 Day: From Local to Production

Adding jobs

Toni Petrina

Lead SRE

Visma e-conomic

SDD Conf 2024, London

Background processing

- Hangfire for both UI and coordinator

- PostgreSQL as storage

Tasks overview

- Add Hangfire

  - PostgreSQL as backup store

- Add recurring job

- Enqueuing and scheduling jobs

- Job versioning

Let's go!

(workshop time)

A note on versioning

- Jobs and workflows can have simple and complex versioning

- For long-running processes, version similar to events

    - Treat cron-trigger as event
